

BAMBOOM+
Nature's best for babies

LOOKBOOK 2024

CONSCIOUS CHOICE

We mix style and ecology

Bamboom is an Italian early childhood brand specialising in high-quality natural and eco-friendly products what represent the right mix of fashion, functionality and sustainability.

Our mission is to combine style and ecology in order to support lower CO2 emissions and build a better future for today's little ones.

OUR STORY

Bamboom lovingly creates the essentials for the little ones, choosing natural and eco-friendly materials to create a mix of style and ecology with made-in-Italy design.

Bamboom was born in 2012 from an idea of Pascalle De Jongh, a Dutch born entrepreneur with experience in the early childhood sector. Thanks to her passion for fashion and her love for natural and recycled materials, she carefully follows the trends in various countries.

Neutral colours, Italian design combined with Nordic style and natural fabrics represent a modern and environmentally friendly style, an inimitable elegance and practicality for the everyday life of the little ones. The collections, designed in Italy, approach the needs of babies and their parents by offering innovative, practical and always fashionable solutions.

It is our aim to continue to choose environmentally sustainable fabrics such as natural bamboo, organic cotton and recycled materials: this commitment is also reflected in the packaging, in the internal management of the company's activities and in the packaging which are increasingly sustainable with recycled cardboard and recycled plastic.

We are engaged in combining style and ecology in order to support lower CO2 emissions and build a better future for today's children and tomorrow's generations.

OUR COMMITMENT

Bamboom items meet the needs of the modern parent who is looking for a fashionable, functional and environmentally friendly product.

Bamboom, always green!

We have always chosen natural fabrics and recycled materials for both products and packaging.

At the heart of our philosophy is a commitment to sustainability in order to support lower CO2 emissions and contribute to the preservation of the planet, for present and future generations.

This is reflected in the selection of natural and environmentally sustainable materials to create collections that represent the right mix of style and ecology.

Our priority is the safety of the fabrics, which are certified and subjected to strict quality controls, to guarantee the well-being of the little ones and peace of mind for their parents.

The green perspective is evident at every stage of production: from the choice of eco-friendly fabrics for the clothing, underwear and accessories collections, to the padding made entirely from natural materials or recycled PET.

We aim to continue to choose natural fabrics and recycled materials: this commitment is reflected also in our packaging, in our internal business management and in our wrapping, which is increasingly sustainable with recycled cardboard and plastic. Environmentally sustainable materials such as natural bamboo fibre are consciously chosen, organic cotton, coconut and beech wood.

Green choices also include recycled materials such as R-PET and PLA: recycled PET used in the collections is obtained through a process that generates less CO2, while PLA, used in plates, glasses and cutlery, comes from vegetable waste and represents a sustainable and safe solution for food contact.

We work to balance fashion, functionality and sustainability, showing that it is possible to care about style without compromising on ecological ethics.

The materials used are certified according to their features:

Bamboom's **Fish** collection introduces fish friends.

A cute design where round, uniform shapes dominate. In two easily matched colors: from soft shades with a tendency toward feminine tones, such as nude, sand and soft pink, to the more neutral version with a touch of ocean blue. The collection is designed to make all moments of the little ones' day richer and more fun, from play to rest.

Each accessory is made from natural and eco-friendly materials that are safe for little ones, from the various fabrics to the natural yarn used in the toys.

Bamboom's **Boomy's World** collection introduces Boomy the bear and his forest friends.

The map that features this pattern, styled in a single colour makes it easy to match the colours of the Bamboom collections, invites you to find Boomy through his streets and discover how he lives his day together with his friends in the forest.

Their adventures will follow your baby from naptime, to bathtime, to feeding time.

The softness of the natural and eco-friendly fabrics, combined with the Made in Italy design makes this fantasy a precious fairy-tale playmate for your baby.

The **Rosehip** collection introduces the spring world of pink fruits. Freshness dominates the fantasy of the collection, thanks to the gritty finesse of the designs.

A fantasy that enriches the moments of resting, bathing and feeding, with a delicate floral theme that adorns every accessory, bringing freshness and joy to every moment of the little ones' day.

Made from natural and eco-friendly materials, the Rosehip, will wrap little ones in the softness of Bamboom products.

The **Tulips** collection introduces the Tulips theme.

We thought of a field of tulips in muted colours and feminine scents,
The stylised tulips were created in harmonious shades of nude, with a bold touch of pink.

This collection, made from natural and eco-friendly materials, will pamper the little ones
stimulating their creativity and love of nature, accompanying them from play to rest.

PURE

Long Sleeves Crossed Shirt- 223

Size: 1M

The crossed top is fitted with a press stud fastener, making it ideal for the baby's first month of life:

- greater safety and convenience during changing
- the crossed opening reduces friction on baby's neck and also the risk of skin irritation
- the crossed model reduces the risk of suffocation by ensuring that the head remains in place during sleep
